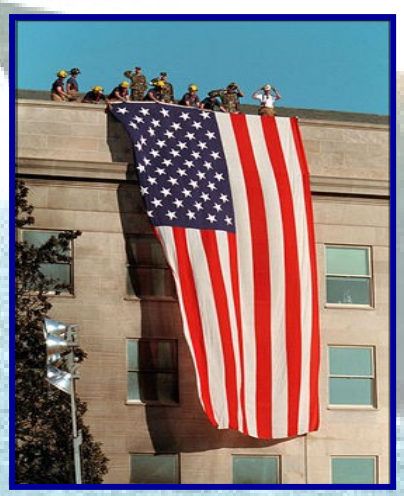
OPNAV N76

PENTAGON EMERGENCY



ACTION PLAN

CDR Randy Snyder
(703) 695-7642
Randall.Snyder@navy.m

Surface Warfare N76

IMPLEMENTATION
PRIMARY PLAN

- **The following information is applicable in case of emergency evacuation from N76 Pentagon (5B453) spaces.**
- **Safety of life takes precedence over security in all instances!**
  - **Stop what you are doing and begin evacuating immediately. The key to a successful evacuation is your prompt action, hesitation leads to delays and backups in the stairwells.**
- **There are two exits from our current space, one is an entrance (fwd) and one is an strictly an emergency exit (aft).**

IMPLEMENTATION
PRIMARY PLAN

- **It is very important to follow the directions of the Computer Emergency Notification System (CENS) and the Emergency Public Address System.**
- **Each system will relay specific instructions about how the Pentagon Force Protection Agency wants us to react to a particular emergency**
  - **Evacuation to the outside, evacuation to another part of Pentagon or staying in place are all possible scenarios**
  - **Please become acquainted with the Pentagon Building Security and Emergency Procedures Guide as it has very important information you will need during emergencies**

IMPLEMENTATION (CONT)
PRIMARY PLAN

- **The N76 Military member arriving first at the space doors will take charge of the Emergency Egress bag and solicit assistance from others to safely disperse the equipment, utilize it properly if required, and exit the building.**

  -This person may be required to wait with the emergency tools to ensure all N76 personnel have safely exited the space.

  -When leaving from the front door of N76, you may encounter a smoke barrier wall. Follow the directions on the posters to navigate past the walls.

- **As in any emergency requiring evacuation, all personnel are reminded to not use the elevators, and proceed quickly to the nearest exit and stairwells.**

IMPLEMENTATION (CONT) PRIMARY PLAN

- **Immediately exit the Pentagon from the nearest safe exit, do not stop.** ***Unless a specific muster area is announced by the CENS or PA, move well clear of the building and proceed to the N76 designated muster area (south parking lot, between rows 7 and 8, prior to the entrance of the pedestrian tunnel to Army Navy Dr.)***

  - **Each Branch must maintain an accurate muster roster, with contact numbers, that is easily locatable and transported during an emergency**

  - **Report to your branch representative, and await further instructions.**

  - **Branch Reps will have rosters and check people off as they report.**

  - **Branch Rep will then report to 1 of the 3 N76**

IMPLEMENTATION
PRIMARY PLAN

- **The Pentagon Force Protection Agency has identified 5 muster points outside of 1500 feet from the Pentagon**
  - **Virginia Park**
  - **Arlington Eisenhower**
  - **Crystal City North**
  - **Arlington North**
  - **Columbia Island**
- **In the event we are directed to one of these points the PFPA will have agents directing you to the location**

IMPLEMENTATION
SECONDARY PLAN

- **In the event that our primary muster point is inaccessible to foot traffic, our secondary muster point will be the corner of South Eads and South Rotary streets (Parking row #26), which is towards the National Airport end of the parking lot.**

Emergency Escape Mask Program

In the event of a Chemical, Biological, Radioactive, or Nuclear event your Emergency Escape Mask will afford up to 65 minutes of protection.

- **Normal Condition**
  - **Keep mask at desk or work area.**
  - **Additional masks accessible in common area cabinets.**
- **Heightened Threat Condition**
  - **Alerts via scripted message on computer screens.**
  - **Carry masks when away from desk or work area.**
- **Emergency Condition**
  - **CBRN Directorate confirms response of automatic detectors.**
  - **Emergency instructions displayed on computer screens. Public address system provides alerts and instructions.**
  - **For localized hazards, individuals may mask on their own.**
  - **First responders deployed.**

CBRN Training:

Emergency Escape Mask Program

- **Emergency Escape Mask Procedures**
  - **Since it is a single use mask, do not don unless told by PA, CENS, or a clear danger is imminent**
  - **Keep your REAL mask separate from Training mask and in a readily available location**
  - **Check mask package for leakage/punctures once a month**
  - **Make sure you remove neckwear and earrings and secure long hair with provided hair band before donning**
  - **Make sure neck dam is secure to skin and nose plug is in place**
  - **After successfully donning your mask, check with your neighbors to make sure they too have successfully donned the mask**
